

The blaugelb Foil Dispenser for simple and convenient cutting of fleece-backed foils.

blaugelb Foil Dispenser

For simple and precise foil cutting – portable and usable everywhere.

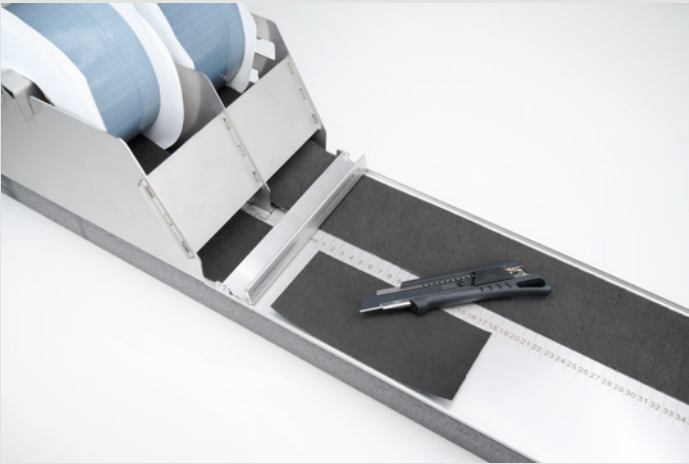

Product features:

The blaugelb Foil Dispenser is the perfect tool for precise cutting of fleece-backed foils and is designed for a maximum foil width of 90 mm. The blaugelb Foil Dispenser helps to eliminate the need for laborious measuring of the foil to be cut as the laser-engraved scale in the cutting table of the blaugelb Foil Dispenser enables precise cutting of the foils. At the same time, the blaugelb Foil Dispenser ensures that the workstation remains tidy and clean. The fixture for storing the cutter knife on the back of the foil dispenser also aids in this.

The foils can thus be cut to length in advance in the workshop and attached to the window frame to allow for faster and more efficient work at the building site.

- The ideal tool for fast and safe foil cutting
- Easy to use, robust and durable for daily use in the workshop
- Precise and straight cutting of foils thanks to the cutting insert for cutter knife
- No laborious measuring of the foils thanks to the scale laser engraved into the cutting table
- Foils are not contaminated by dirt from the workshop
- The workstation remains tidy and clean

The blaugelb Foil Dispenser is made of high-quality, robust stainless steel (V2A). With its pre-installed fixed base plate, it is not necessary to screw the blaugelb Foil Dispenser to a base. It is thus portable and can be used at different workstations.

In addition to classic sealing and the associated foil cutting, the blaugelb Foil Dispenser also earns points in another discipline: In every situation that requires smaller, precisely cut foil pieces, the cutting area with its scale is worth its weight in gold. When sealing open profile cavities and faces of window sill connection or thermal insulation profiles in particular, this tool – in combination with blaugelb Foil Outside **SL¹⁰⁵⁰ Power One** – pays off. The foil is available in many finely graduated widths and is thus ideally oriented toward profile system dimensions with widths ranging from 64 mm to 88 mm.

The blaugelb Foil Dispenser is available in two versions:

- blaugelb Foil Dispenser single (item 9131481)
This version has one roll holder
- blaugelb Foil Dispenser double (item 9131482)
This version has two roll holders that can be used simultaneously when cutting

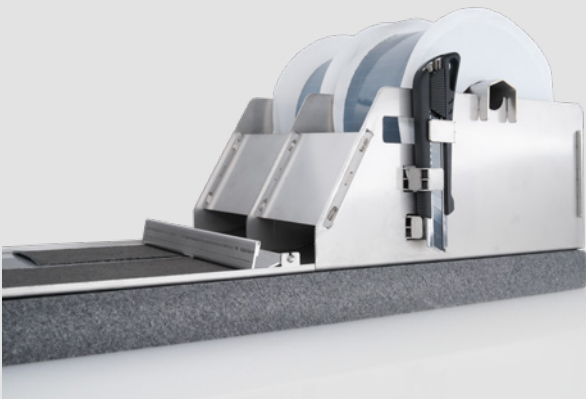

Product benefits:

- The ideal tool for fast and safe foil cutting
- Easy to use, robust and durable for daily use in the workshop
- Precise and straight cutting of foils thanks to the cutting insert for cutter knife
- No laborious measuring of the foils thanks to the scale laser engraved into the cutting table
- Foils are not contaminated by dirt from the workshop
- The workstation remains tidy and clean
- No corrosion on the foil dispenser

Technical data:

Material:	Stainless steel (V2A)
Weight:	1.9 / 3.8 kg (unloaded)
Dimensions:	13.5 x 10.5/20.5 x 75 cm

Product name	PU	Item no.
blaugelb Foil Dispenser single	1 piece	9131481
blaugelb Foil Dispenser double	1 piece	9131482

Preparation and processing:

Insert the blaugelb foil roll(s) with the required width in the blaugelb Foil Dispenser, measure the desired length using the laser-engraved scale on the cutting table and cut to the desired length using the cutter knife. Then process the cut foil in the usual manner.
