

blaugelb Adapter Set

For safe connection of the motor and its surrounding environment.

Product features:

The blaugelb Adapter Sets made of impact-resistant plastic are attached to the blaugelb Roller Shutter Motor and quickly render it suitable for various sizes of octagonal shafts and their applications.

By simply being attached and fixed in place on the blaugelb Roller Shutter Motor, they ensure quick and universal installation and serve to securely connect the motor and shaft.

The blaugelb Adapter Sets consist of a limit switch driving ring, which supports the shaft, detects the movement of the roller shutter motor and transmits it to the controller in the roller shutter motor for exact limit switching. In addition, a motor coupling is included in the set that is simply attached to the roller shutter motor and transmits the torque to the shaft.

- Quick and easy to fit
- Precise mounting of the roller shutter motor
- Perfect transmission of torque to the shaft
