blaugelb Control Unit
The control unit for switching blaugelb Roller Shutter Motors of the COMFORT series in groups.

Product features:

With the blaugelb Control Unit, blaugelb Roller Shutter Motors of the COMFORT series can be easily and quickly combined into groups and subgroups. The blaugelb Control Unit serves as a multiple control unit to which one or two blaugelb Roller Shutter Motors can be connected, which can then be connected to other roller shutter motors and a control unit. This enables the simultaneous control of several roller shutters in the room or on one floor.

Only buttons are used for local control, e.g. the blaugelb Flat Pushbutton 10A, item no. 9084807. (Switches must not be used.)

- Easy option for combining roller shutters into groups and subgroups

- Simple and quick installation

- Increases the ease of controlling the roller shutter

- Durable and reliable

Control Unit
The control unit for switching blaugelb Roller Shutter Motors of the COMFORT series in groups.

The choice of control is not restricted at the central connection. The blaugelb Flat Pushbutton 10A (9084807), the blaugelb Toggle Switch 10A (9084808), the blaugelb Surface Switch 10A (9084809) or the blaugelb Timer (9084810) can be used as control element. The blaugelb Control Unit can also be used as a cut-off relay.

The blaugelb Control Unit comes with a two-year warranty.

Technical data:

Operating voltage:	230 V/50 Hz
Power consumption:	10 mA (relay)
Switching capacity:	max. 2 A, 250 VAC
Motor load:	max. 750 VA (only 230 V motors with limit switching)
Operating temperature:	0 °C to +60 °C
Screw terminals:	1.5 to 2.5 mm^2
Dimensions:	51 x 47 x 20 mm (HxWxD)
