

blaugelb Timer

Enables the control of several wireless roller shutter motors – with every convenience.

Product features:

The blaugelb Timer is a time-based control for blaugelb Roller Shutter Motors of the COMFORT and ELECTRONIC series. This allows roller shutters to be operated automatically at preset times. A practical holiday function that triggers the roller shutters as if at random also increases the security aspect by giving the impression that the house is not empty.

Of course, the blaugelb Timer can also be used to control the roller shutter completely manually and independently of the time. A simple switch from the automatic program to the manual mode is all that is required.

The installation of this control centre is very simple as it is compatible with all standard switches (cutout size 50 x 50 mm according to DIN 49075) and can be easily and quickly exchanged with an already existing switch. In addition, it offers a power reserve of approximately one minute.

The blaugelb Timer comes with a two-year warranty.

- Manual or automatic mode possible
- Random/holiday function for increased security
- Simple and quick installation
- Increases the ease of controlling the roller shutter
- Durable and reliable

Technical data:

Nominal voltage:	230 V/50 Hz
Switching contact load:	3 A
Operating temperature:	-5 °C to +45 °C
Power reserve:	Approx. 1 minute
Protection category:	IP20
Protection class:	II
Display:	LCD display
Fastening:	Plastic frame with screws
Dimensions:	80 x 80 x 50 mm

Product name	PU	Item no.
blaugelb Timer 230 V / 50 Hz	1 piece	9084810

Mounting instructions:

Please refer to our blaugelb installation instructions for further information.
Further information can also be found in the respective operating instructions for our controllers and their components.
